

MEMORADUM

July 1, 2008

To: Providers

From: DMHDDAD and APS

Re: Implementation of APS Audit Tool

During the most recent APS Clinical Directors/Utilization Managers Forum, the APS Audit Team reviewed the revised audit tool and announced its implementation for July 1, 2008. In an effort to align the implementation timeline of the new Audit Tool with the revised Service Guidelines, DMHDDAD and APS have decided to make both effective August 1, 2008. The revised audit tool remains posted on the APS Knowledge Base at www.apsero.com for providers to review and become familiar. Please note that the *Audit Frequency* change announced at the CD/UM meeting will not be delayed as this will not be affected by the Audit Tool changes or the updated revision of the DMHDDAD Provider Manual. The change in frequency will begin July 1st.

Any questions regarding this implementation phase or this correspondence should be directed to:
